It's time to rethink security operations

! An essential checklist for your security response solution

Emerging enterprise threats

Dangers are more serious and more numerous than ever before.

429 million
identities exposed

Sensitive data at risk.

In 2015, the total number of identities exposed via data breaches increased 23%, to 429 million.[1]

<1 hour
to breach

Accelerated time to compromise.
Time-to-compromise is now measured in minutes, and data exfiltration happens in days.[2]
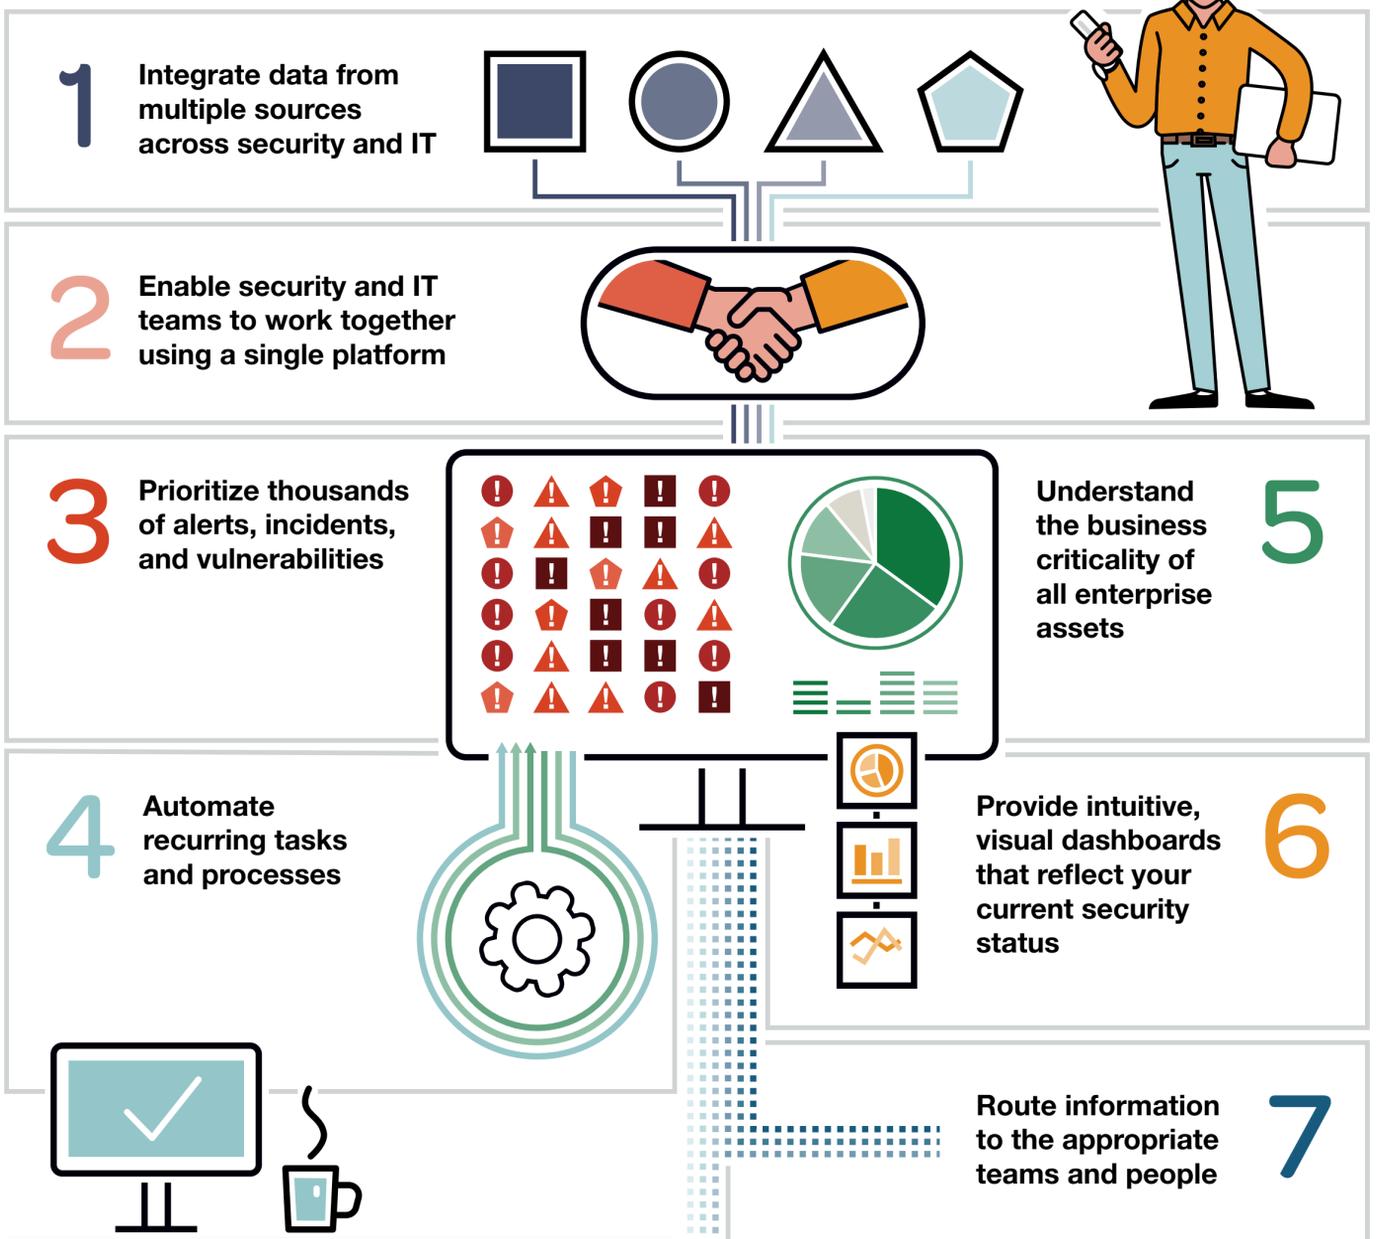

>6 months
to detect

Slower time to detection.
Detection of a breach can take months, with a median of 201 days to discovery.[3]

Required capabilities for your security response solution

To succeed in today's high-risk environment, your team needs a solution that can:

1 Integrate data from multiple sources across security and IT

2 Enable security and IT teams to work together using a single platform

3 Prioritize thousands of alerts, incidents, and vulnerabilities

5 Understand the business criticality of all enterprise assets

4 Automate recurring tasks and processes

6 Provide intuitive, visual dashboards that reflect your current security status

7 Route information to the appropriate teams and people
